## **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: The arrangement of a plurality of individually addressable electrodes on a substrate, and the excitation voltage source that is configured to provide regulated excitation voltage to each electrode are known in the art such as taught in Moulin and Winker et al, best references noted, for example. However, the latter patents do not teach or fairly suggest that such a regulated excitation voltage is used to generate a wave pattern on a surface of a gel membrane that is positioned adjacent a surface of a prism. Further, the excitation voltage source of the patents in consideration does not have any compensating device that is responsible for causing the gel membrane to return to initial state upon removal of the excitation voltages. Therefore, in light of this difference, it is concluded that the present invention distinguishes over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Loha Ben whose telephone number is (571) 272-2323. The examiner can normally be reached on Monday to Saturday, generally between 12:00 noon and 8:00 p.m.
